Invader

4277 Invader

With over 75,000 double rubs (Wyzenbeek, Cotton Duck), Invader uses a mix of yarns to create strong contrast and an illusion of dimension. Constructed from 100% polyester with an acrylic backing, Invader also benefits from Tri-sistant, Brentano's brand name, cross linked stain resistant treatment; Tri-sistant is chemically bonded to the fibers in the fabric thus producing a much longer lasting stain resistant finish. Eight colorways including Frozen Moon, Martian and Wreckage provide commercial applications a mix of energetic merriment that delight the eye.
