Remark

During production, the metal foil goes through an intensive process that was developed especially for this collection. It is coloured in such a way that the wallcovering takes on the nuances of an authentic metal look. Finally, for some references the pattern is finished with glass beads. It is normal that the glass beads that do not touch the adhesive layer, come loose. This has no impact on the final result. The glass beads in the adhesive layer adhere firmly and form the pattern. Matching plains can be found in collection Metal X
