4121 Akari

A tribute to Isamu Noguchi, 118" double-width drapery Akari embraces the Japanese understanding of light — one of both weightlessness and illumination. Created with a fil-coupé technique that clips the weft yarns at the edge of each geometric form to reveal the sheer underneath, Akari's vertical tiers suggest elegant movement for commercial, hospitality and residential installations. Available in five colorways, the pattern's 100% Trevira CS contents pass NFPA 701, IMO and other international fire standards with no additional finishing.
